

Empower Paramedics to Make the Decisions that Save Lives

The MetroPCR mobile medical records system with Zebra Technology interoperability empowers first responders to make informed decisions that improve patient care

Having immediate access to a patient's medical records helps paramedics make informed, efficient decisions. MetroPCR is an advanced mobile medical records system utilized by fire departments and hospitals nationwide to provide instant access to essential health information that ultimately helps improve patient safety and care outcomes in critical situations.

Zebra ET45 tablet

Leveraging the interoperable Zebra ET45 tablet, MetroPCR ensures consistent scan performance even at night and in direct sunlight, providing reliable data capture when it's needed most. Built to withstand emergency conditions, the rugged ET45 offers exceptional durability and is equipped with an extended battery life that supports back-to-back EMS calls, keeping first responders connected and operational during long shifts. Featuring an integrated red laser barcode scanner, the Zebra ET45 can quickly read PDF417 codes on state driver's licenses and instantly retrieve essential patient data such as demographics, call history, and allergies. This minimizes manual input, allowing paramedics to focus on delivering efficient, high-quality care in the field when it matters most.

Advantages of MetroPCR mobile medical records system + Zebra ET45 tablet

The MetroPCR mobile medical records system leverages the interoperable Zebra ET45 tablet with red laser barcode scanner to provide unprecedented support for first responders.

- **Zebra-enabled interoperability and rugged durability.** Withstands drops, vibrations, water, and extreme temperatures.
- **Advanced barcode scanning and automated data entry.** Includes an integrated red laser scanner for quick retrieval of critical patient data, minimizing manual entry and errors.
- **Rapid deployment and efficient data entry.** Ensures quick setup with streamlined input for faster, accurate information handling.
- **Extensive customization and native Android compatibility.** Provides users with a flexible, user-friendly platform.
- **Offline functionality and enhanced connectivity.** Operates smoothly in disconnected environments and offers Wi-Fi 6, 4G, and 5G to keep first responders connected even remotely.
- **Real-time data access and GPS location services.** Provides instant access to vital data (e.g., patient records, maps) with accurate location tracking and navigation for rapid response.
- **Extended battery life and hot-swap capability.** Ensures uninterrupted use during extended shifts.
- **Zebra mobility DNA for security and device management.** Delivers enhanced security, centralized control, and comprehensive data protection.
